DETAILED ACTION

Upon further consideration in view of the latest amendments filed on 01/18/2011, the restriction requirement presented below applies under 35 U.S.C. 121 and 372, since the amended claims contain the following patentably distinct species which are not so linked as to form a single general inventive concept under PCT Rule 13.1:

Species 1 (claims 23, 32-33 and 36), drawn to an apparatus comprising the cooler that is a syringe having a cooling apparatus / means for extracting the uniform solution from the reaction container.

Species 2 (claims 23, 32, 34 and 37), drawn to an apparatus comprising the cooler that is a means for putting a solid which has a temperature that is lower than the reaction container into the uniform solution within the reaction container.

Species 3 (claims 23, 32, 35 and 38), drawn to an apparatus comprising the cooler that is a stirrer for stirring the two-phase sample within the reaction container to yield a uniform solution / means for mixing a compound having a lower boiling point directly into the uniform solution within the reaction container.

Applicant is required under 35 U.S.C. 121 and 372 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 21 and 31 are generic. Note that claim 22 will be examined on the merits together with the generic claims and the claims that read on the species elected.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
